DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Part 2

Trademark Applications; Filing Dates

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Proposed rulemaking.

SUMMARY: Patent and Trademark Office proposes amendments of the rules of practice in trademark cases to revise the filing date requirements for an application for registration of a mark and to allow the Office to return applications which fail to meet these requirements. The amendments also define with additional specificity the nature of the drawing and specimens which must accompany an application in order for it to be entitled to a filing date. The proposed amendments are needed to reduce the special handling required to process and control applications not entitled to a filing date and the impact of such special handling on delaying other applications. Delays in application processing also occur when drawings fail to include a complete heading and Office personnel must enter the necessary data on a large volume of drawings. The proposed amendments are designed to speed the initial processing of applications and the filing of copies of drawings in the Trademark Search Room. An additional effect of the amendments would be a significantly earlier notification to an applicant of the status of papers filed as an application for registration of a trademark.

DATE: Written comments by January 5, 1982.

ADDRESSES: Address written comments to the Commissioner of Patents and Trademarks, Washington, D.C. 20231. Written comments will be available for public inspection in Room 11E10 of Building 3, Crystal Plaza, 2021 Jefferson Davis Highway, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Ms. Paula Hairston by telephone at [703]557-7464 or by mail marked to her attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION: The Patent and Trademark Office is considering amendments to the rules of practice in trademark cases to amend the requirements for receiving a filing date for an application for registration of a mark, to revise the procedures for returning papers which are not entitled to receive a filing date, to amend the requirements for a drawing submitted as part of an application, to delete the provisions for the Patent and Trademark Office to make or correct drawings for applications to register marks and to specify that a copy of a drawing is not acceptable as a facsimile showing how a mark is actually used in commerce.

The specific rules for which amendments are proposed are §§2.21, 2.52, 2.54, and 2.57. In addition, it is proposed to remove §2.55.

Section 2.21 is proposed to be amended by revising paragraphs (a) and (c). The effect of revising paragraph (a) will be to make the heading a mandatory portion of the drawing of the mark. The result will be the denial of a filing date for an application when the drawing submitted as apart of the application lacks the information required to be in the heading, namely, the applicant's full name and postal address, the date of first use of the mark, the date of first use of the mark in commerce (except for an application filed under §44 of the Trademark Act), and the goods or services identified in the application, or a typical item of goods or services if a number of items are recited in the application. At present, if a drawing is submitted without a heading, or with an incomplete heading, an employee of the Service Division of the Trademark Examining Operation must type the information on the drawing before copies can be reproduced for filing in the Search Room for use by examiners and the general public. Because the applications are batched in numerical order for processing purposes, this added typing delays the processing, not only of the application directly involved, but also of all the applications with later serial numbers. Consequently, the submission of drawings with missing or incomplete headings affects other applicants and contributes to unnecessary delays in sending out filing receipts and in transmitting applications to the examiners.

It is also proposed to remove the words "or other identification" from existing paragraph (a) because they have no meaning.

Paragraph (c) of §2.21 is proposed to be amended to change the procedure for dealing with applications that are so defective, i.e. that do not satisfy the requirements of §2.21(a), that they are not entitled to a filing date.

The procedure within the Patent and Trademark Office under existing §2.21(c) is that all incoming mail is date-stamped in the mail room. All papers submitted as applications for the registration of marks are given serial numbers and are then sent to the Finance Branch for the collection of the fees submitted. After the papers are annotated to show the fee submitted, the papers are returned to the mail room, which sends them to the Classification Team of Trademark Service Division for review. If any application fails to satisfy the requirements of §2.21(a), the applicant or his attorney is notified of the defect and allowed six months to correct it. In the meantime, the papers and fee are held in the Office. The time that elapses between the receipt of application papers in the Office and the dispatch of a letter notifying the applicant or his attorney that the application is not entitled to receive a filing date is approximately three to four weeks and occasionally longer.

If the defect is remedied within the six months allowed, the application is given an effective filing date as of the date when all of the requirements of §2.21(a) are fulfilled. If the requirements for receiving a filing date are not satisfied, the fee, the drawing, and the re-

maining application papers are normally returned. Application papers which, when originally filed, are not entitled to receive a filing date impose extra handling burdens and costs upon the Patent and Trademark Office.

Under the proposed procedure, papers submitted as an application for registration of a mark will be reviewed immediately after their receipt in the mail room of the Patent and Trademark Office. Papers which are so defective that they are not entitled to receive a filing date will be returned to the applicant or his attorney together with any fee that was submitted. The papers will be accompanied by a letter describing the defect or defects. The applicant or his attorney will thus be notified that an application is not entitled to a filing date within about ten days from the date when the defective papers were received. This change will be beneficial to such applicants because they will be notified of, and hence have the opportunity to correct, defects in applications at an earlier time than is possible under existing §2.21(c), and, therefore, obtain an earlier effective filing date, than is now possible. The change will also benefit other applicants by reducing the burden and costs of the Patent and Trademark Office which adversely affect the handling of their applications.

In the event that the applicant resubmits the original application papers together with any additional paper, specimen, drawing, or fee which is required to correct the defect in the original papers, the Patent and Trademark Office will exercise reasonable discretion in determining whether the lapse of time between the date of execution of the application and the receipt in the Office of the corrected papers requires reexecution of the application. A requirement by the examiner that the application be reexecuted will not affect the filing date. See §2.32(b).

It should be noted that the certificate of mailing procedure, 37 CFR 1.8, does not apply to the filing of trademark applications and therefore does not apply to the filing of a resubmitted trademark application. This is not a change from current practice.

Section 2.52 is proposed to be amended by revising paragraph (d) to make it mandatory to include on every drawing submitted as part of an application the identifying information prescribed by the rule. Specifically, "must" is substituted for "should" in the present rule. The reason for this proposed amendment is explained above in the explanation of the amendment proposed for §2.21(a).

Section 2.54 is proposed to be amended to bring this section into conformity with the proposed amendments of §§2.21(a) and 2.52 by excluding an omitted or incomplete heading as a defect which is remediable by amendment after an examiner issues an Office action. Section 2.54 is also proposed to be amended by eliminating the provision for correction of drawings by the Office. The provision is being eliminated because of the lack of facilities.

Section 2.55 is proposed to be removed because the official draftsman of the Office does not have the facilities for making drawings for applications to register marks.

Section 2.57 is proposed to be amended by adding new paragraph (b) to make it clear that a mere reproduction of the drawing by xerographic, photographic or other copying processes will not be accepted as a facsimile showing how the mark is actually used in commerce (or is actually used in the case of an application filed under section 44 of the Trademark Act). No change is being made in the requirement that a facsimile submitted in lieu of a specimen must clearly and legibly show the mark and all matter used in connection therewith as the mark is actually used.

The Patent and Trademark Office has determined that the proposed—amendments are not major rules under Executive Order 12291 since they would benefit trademark applicants and reduce the burdens on the Office.

The proposed amendments will not have a significant adverse economic impact on a substantial number of small entities. (Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*)

Notice is hereby given that pursuant to the Commissioner's authority under Section 41 of the Trademark Act of July 5, 1946, 15 U.S.C. 1123, and Section 6 of the Act of July 19, 1952, 35 U.S.C. 6, the Patent and Trademark Office proposes to amend Part 2 of Title 37 of the Code of Federal Regulations as set forth below.

In the text of the proposed amendments, additions are indicated by arrows and delections are indicated by brackets.

It is proposed to amend 37 CFR, Part 2 as follows:

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

1. Section 2.21 is proposed to be revised to read as follows:

§2.21 Requirements for receiving a filing date.

(a) Materials submitted as an application for registration of a mark will not be accorded a filing date as an application until all of the following elements are received:

(1) Name of the applicant;

(2) A name and address to which communications can be directed;

(3) A drawing [or other identification] of the mark sought to be registered [;] ►containing the information required by paragraph (d) of §2.52;◄

(4) An identification of goods or services;

(5) At least one specimen or facsimile of the mark as actually used;

(6) A date of first use of the mark in commerce, or a certification or certified copy of a foreign registration if the application is based on such foreign registration pursuant to section 44(e) of the [act,] ►Trademark Act,◄ or a claim of the benefit of a prior foreign application in accordance with section 44(d) of the Act;

(7) The required filing fee for at least one class of goods or services. Compliance with one or more of the rules relating to the elements specified above may be required before the application is further processed.

(b) The filing date of the application is the date on which all of the elements set forth in paragraph (a) of this section are received in the Patent and Trademark Office.

(c) If the papers [are so defective that they cannot be accepted, the applicant will be notified and the papers and fee held 6 months. If the requirements for receiving a filing date have not been satisfied within such time, the papers and fee will be returned to the applicant or otherwise disposed of; the drawing or fee of an unaccepted ► applicant may be transferred to a later application.] and fee submitted as an application do not satisfy all of the requirements specified in paragraph 9a) of this section, the papers will not be considered to constitute an application and will not be given a filing date. The Patent and Trademark Office will return the papers and any fee submitted therewith to the person who submitted the papers. The Office will notify the person to whom the papers are returned of the defect or defects which prevented their being considered to be an application.◄

2. Section 2.52 is proposed to be amended by revising paragraph (d) to read as follows:

§2.52 Requirements for drawings.

* * * * *

(d) *Heading.* Across the top of the drawing, beginning one inch (2.5 cm.) from the top edge and not exceeding one-fourth of the sheet, there [should] ►must◄ be placed a heading, listing in separate lines applicant's ► complete◄ name, applicant's post office address, the date [s] of first use of the mark, the date of first use of ► the mark in commerce (except for an application filed under section 44 of the Trademark Act),◄ and the goods or services recited in the application [(]►or◄ a

typical item of the goods or services if a number ►of items◄ are recited in the application [)]. This heading [may] ► should ◄ be typewritten.

* * * * *

3. Section 2.54 is proposed to be revised to read as follows:

§2.54 Informal drawings.

A drawing not in conformity with [§§2.51 to 2.53]► §2.51 or paragraphs (a), (b), (c), or (e) of §2.52 or §2.53 may be accepted for purposes for examination, but the drawing must be corrected or a new one furnished, as required, before the mark can be published or the application allowed. [The necessary corrections will be made by the Patent and Trademark Office upon applicant's request and at his expense.]

4. Section 2.55 is proposed to be removed.

[§2.55 Patent and Trademark Office may make drawings.

The Patent and Trademark Office, at the request of applicants and at their expense, will make drawings if facilities permit.]

5. Section 2.57 is proposed to be revised as follows:

§2.57 Facsimiles.

►(a)◄ When, due to the mode of applying or affixing the trademark to the goods, or to the manner of using the mark on the goods, or to the nature of the mark, specimens as above stated cannot be furnished, five copies of a suitable photograph or other acceptable reproduction, not to exceed 8½ inches (21.6 cm.) wide and 13 inches (33.0 cm.) long, and clearly and legibly showing the mark and all matter used in connection therewith, shall be furnished.

►(b) A purported facsimile which is merely a reproduction of the drawing submitted to comply with §2.51 will not be considered to be a facsimile depicting the mark as actually used on or in connection with the goods or in connection with the services.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See Rules 2.101 to 2.105.

A separate fee of twenty-five dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
